# Key Considerations when ordering a Flight Case Label

**ADCAL**  
Labels

# 🤔 Considerations for a Flight Case Label Order

## Ultra Durability

Our unique print method ensures your design is shielded behind clear, rigid PVC.

### Your Logo 1

We require logos in a **vector format** (ideally). A large file may work but depending on the print sizes required, the finish could come out blurry.

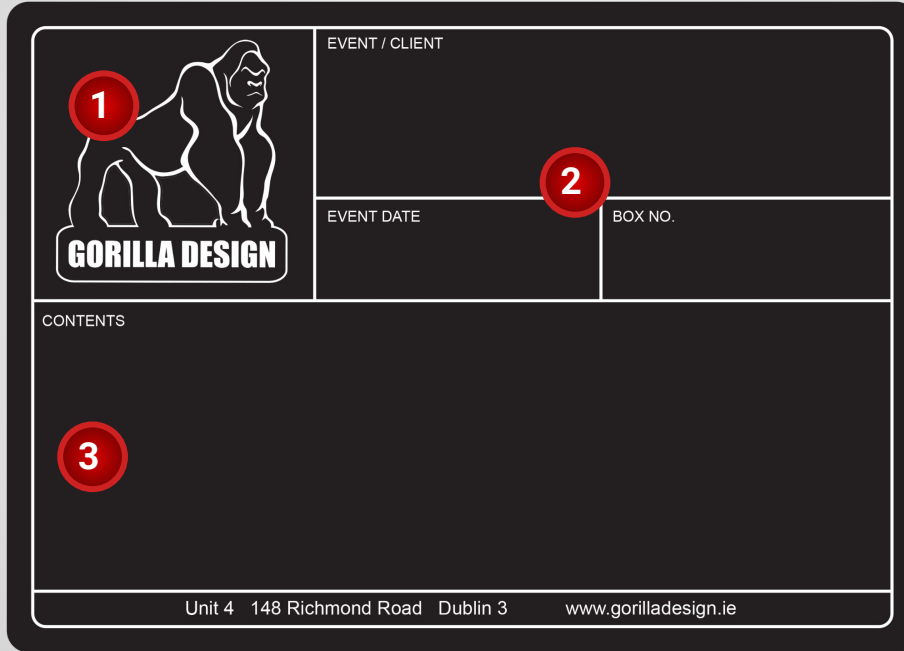

We can advise on whether your logo file is a good enough quality.

### The Text Content 2

The idea is that you manually put on the information in the **boxes/fields** with a permanent marker (or **Tour stickers**) for each 'event' and then wipe them off afterwards using our **EasyClean**.

So consider what information is important to your operation and build it in to the design - or the artwork brief you send us.

You may wish to include QR codes or sequential numbering... That's no problem!

### 3 Label Colours

We can produce labels in **full colour**.

## The Sizing

We can produce these labels in virtually **any size** but for stock sizing, we can provide;

- 55 x 85mm
- 89 x 127 mm
- 127 x 178 mm
- 140 x 200 mm
- 190 x 280 mm

## Adhesive Options

We generally provide our labels with an ultra high-tack adhesive which is ultimately **removable**. It ensures you can use the label on different cases/equipment but it doesn't come off unless you want it too with a hammer and chisel!

Alternatively we can provide a **permanent** adhesive which is not reusable but will last for years in all environments and weather conditions
