Key Considerations when ordering a Flight Case Label

ADCAL
Labels

🤔 Considerations for a Flight Case Label Order

Ultra Durability

Our unique print method ensures your design is shielded behind clear, rigid PVC.

Your Logo 1

We require logos in a **vector format** (ideally). A large file may work but depending on the print sizes required, the finish could come out blurry.

We can advise on whether your logo file is a good enough quality.

The Text Content 2

The idea is that you manually put on the information in the **boxes/fields** with a permanent marker (or **Tour stickers**) for each 'event' and then wipe them off afterwards using our **EasyClean**.

So consider what information is important to your operation and build it in to the design - or the artwork brief you send us.

You may wish to include QR codes or sequential numbering... That's no problem!

The diagram shows a black rectangular label with white text and fields. It is divided into several sections:

- Top Left:** A white silhouette of a gorilla with the text "GORILLA DESIGN" below it. A red circle with the number "1" is overlaid on the gorilla.
- Top Right:** A field labeled "EVENT / CLIENT". A red circle with the number "2" is overlaid on this field.
- Middle Left:** A field labeled "EVENT DATE".
- Middle Right:** A field labeled "BOX NO.". A red circle with the number "2" is overlaid on this field.
- Bottom:** A large field labeled "CONTENTS". A red circle with the number "3" is overlaid on this field.
- Footer:** A white bar at the bottom containing the text "Unit 4 148 Richmond Road Dublin 3 www.gorilladesign.ie".

3 Label Colours

We can produce labels in both **full colour** and **spot colour**.

The Sizing

We can produce these labels in virtually **any size** but for stock sizing with radius corners we can provide;

- 55 x 85mm
- 89 x 127 mm
- 127 x 178 mm
- 140 x 200 mm
- 190 x 280 mm

Adhesive Options

We generally provide our labels with an ultra high-tack foam adhesive . It ensures you can use the label on different cases/equipment and rough surfaces and it doesn't come off unless you want it too with a hammer and chisel!

Alternatively we can provide a thinner still **permanent** 3M adhesive which some clients prefer since it is less proud and no chance of lifting on corners .

Flight Case Labels Comparison

ADCAL	Flightcase Label	Tour Label	Temporary Flightcase Label	Laser/Inkjet Printed Flightcase Label	Transparent Protection Label	Flightcase Sticker
<p>* Indicates extra fees ^ Indicates various options</p>	<p>The original Flightcase Label uses undersurface printing technologies to ensure the preprinted data/artwork is ULTRA durable! You can then apply handwritten variable data (with a Sharpie) and this can be removed easily with Adcal EasyClean.</p>	<p>A Tour Label is a preprinted vinyl label that is applied over the top of a flightcase label. You can add your variable data and it can be removed with Adcal EasyClean so you can reuse it.</p>	<p>A Temporary Flightcase Label is preprinted, comes on a roll and is easily applied on top of a flightcase label. You can input your own variable data but this cannot be wiped off - it is single use.</p>	<p>An A4 preprinted label for you to print your own variable data in-house DIY! Then stick on top of a Flightcase Label.</p>	<p>An overlay to add protection to all flightcase label types to prevent hand written info (sharpie) being smudged/damaged</p>	<p>A sticker that you can add to a flightcase or other equipment - Logo, Artwork or any other creative ideas!</p>
